DETAILED ACTION

The response filed 7/27/06 to the Office action has been entered. Claims 57-64 are pending.

Election/Restrictions

1. Applicant's election without traverse of Group I, claims 57-58 and 64 in the reply filed on 7/27/06 is acknowledged.
2. Claims 59-63 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim.

Election was made **without** traverse in the reply filed on 7/27/06.

Double Patenting

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 57-58 and 64 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claim 1 of U.S. Patent No. 6,794,140. Although the

Art Unit: 1637

conflicting claims are not identical, they are not patentably distinct from each other because the instant claims 57-58 and 64 are drawn to a method of isolating RNA from a biological sample of human or animal subject comprising treating the sample with a reactant capable of covalently modifying the 2'-OH position of the ribose rings of the RNA under conditions so that a proportion of the 2'-OH position of the ribose rings bear a substituent and preparing isolated RNA by separating material containing the substituent from the sample on the basis of a property of the substituent, while the method of claim 1 of U.S. Patent No. 6,794,140 is also for isolating RNA with the same steps as recited in the instant claim 57 except that in the method of claim 1 of U.S. Patent No. 6,794,140, the sample used for isolating RNA is not limited to a human or animal subject. However, the specification of U.S. Patent No. 6,794,140 discloses that the naturally occurring RNA can be derived from humans or animals (See column 2, lines 36-39). Therefore, the instant claims 57-58 and 64 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claim 1 of U.S. Patent No. 6,794,140.
